About Me

Gold Medalist in BS Computer Science, specializing in Full Stack Development (.NET Core, React.js), Python, and AI Enthusiast. Skilled in building AI-powered solutions and automating workflows. Eager to apply programming expertise in impactful software projects while actively pursuing continuous learning.

Experience

ASM WIZ LLC | Houstan Texas, USA   **2024-Sep - 2025-Sep**
Full stack Developer

GrowUp Tech Soutions | National Incubation Center, H-9/4, Islamabad   **2022-June - 2023-June**
Software Developer

Education

NATIONAL UNIVERSITY OF MODERN LANGUAGES (NUML), Islamabad   **2020 - 2024**
Bachelor of Computer Science (BSCS)

CGPA (3.95 / 4.00)

Projects

Refer App
Developed a .NET Core Web API backend for a Flutter app with Stripe Payment Gateway (connected accounts, onboarding, payouts) and Firebase integration.

Schedule-Buddy App   **https://dailyroutineapp.somee.com**
This is a Flutter routine app. I developed the complete backend using .NET Core Web API, SignalR, BackBlaze, SQL, built the admin dashboard in React with TypeScript and landing page.

AI-Powered Business Location Scout   **(Final Year Project)**
This is an AI based web application that suggest best suitable location to any kind of business.
Technologies used: Reactjs, Python, Data Augmentation, AI, ML, Web Scrapping, MySQL, Numpy, Matplotlib, OS, OpenCV

Halliburton   **https://qcdoc-dev.corp.halliburton.com**
This is a .Net, web based vendors quality assurance system. I make new storedprocedures, optimized its pages, clean the code and support it. Implement EF init to call storedprocedure and convert it into Web API project.
Technologies used: DotNet FrameWork, MS-SQL Server, MS-SQL Profiler, DotNet Core.

NCCCO   **https://stg1995-my.ccocert.org/**
This is a NCCCO certification system. I worked on this as a software developer. I worked with DotNet Core Web API, made database schema, application structure from scratch, APIs, MySQL, React js, Typescript.

The Hunt   **http://app.thehunt.ltd**
This was a client project. I made APIs in ASP.NET Web API design pattern, used database of Postgresql and Hangfire.

UpWork Analytics (UpWork Extension)
This was an extension. I made user profile interfaces in bootstrap and APIs in ASP.NET (MVC) design pattern, used database of MS-SQL and worked with SignalR (Screen Tracking).
