SUMMARY

Gold Medalist in BS Computer Science with expertise in Full Stack Development (.NET Core, React.js), Python, AI, and modern software engineering. Experienced in building AI-powered applications, integrating LLM APIs (including Groq), and automating workflows. Proficient in AI-assisted development using Claude, Cursor, and GitHub Copilot, with hands-on experience in Docker and containerized application deployment. Passionate about building scalable, intelligent software solutions while continuously learning emerging technologies.

EXPERIENCE

Full stack Developer (.NET, React.js)

Koders Point | Lahore, Pakistan

Oct 2025 – Mar 2026

Full stack Developer (.NET, React.js)

ASM WIZ LLC | Houston Texas, USA

Sep 2024 – Sep 2025

Software Developer

GrowUp Tech Solutions | National Incubation Center, H-9/4, Islamabad

Jun 2022 – Jun 2023

EDUCATION

Bachelor of Computer Science (BSCS)

NATIONAL UNIVERSITY OF MODERN LANGUAGES (NUML), ISLAMABAD

2020 - 2024

CGPA
3.95 / 4.00

SKILLS

- AI (Machine Learning & Deep Learning)
 - Data Augmentation
 - Web Automation & Scraping
 - Database Architecture (SQL/NoSQL)
 - Microsoft Dynamics 365 (XRM)
 - React.js (TypeScript)
 - .NET Core
 - CI/CD Pipelines (Azure)
 - Python
- C#
 - C++
 - Docker
 - Angular
 - MongoDB
 - Power Apps
 - Django - Flask
 - RESTful APIs

PROJECTS

MATechs Solutions AI Chatbot & Website

<https://matechs.intellectgate.co.nz/>

React.js, TypeScript, Vite, Node.js, Groq, LLaMA, MiniLM, RAG, Vercel

Built the MATechs Solutions website using React.js, TypeScript, and Vite, and engineered a production-grade RAG chatbot powered by Groq-hosted LLaMA models. Created a knowledge base from company documents and FAQs, generated MiniLM embeddings, and implemented vector similarity search for grounded AI responses. Integrated REST APIs and deployed the solution on Vercel, delivering scalable, low-latency serverless performance.

Refer App

ASP.NET Core, Stripe(connected accounts, onboarding, payouts), Firebase

Delivered secure ASP.NET Core Web APIs for a Flutter e-commerce application, implementing JWT authentication and Firebase Cloud Messaging (FCM). Integrated the Stripe payment gateway with Connected Accounts, platform payments, and automated payouts. Customized Stripe payment workflows for multi-recipient transactions and validated end-to-end payment and payout scenarios using Stripe's sandbox environment, test connected accounts, and test cards..

MySchedule Buddy (Backend, Admin Panel, Landing Page)

https://play.google.com/store/apps/details?id=com.routine.routine_planner

<https://dailyroutineapp.somee.com>

Flutter, ASP.NET Core Web API, React.js, TypeScript, Vite, SQL Server

Built ASP.NET Core Web APIs and designed the SQL Server database for a routine planning application. Developed a React.js and TypeScript admin dashboard and landing page for user management, analytics, and schedule monitoring. Integrated SignalR, Hangfire, OneSignal, JWT authentication, and Backblaze B2 cloud storage. Configured CI/CD pipelines and deployed the frontend and backend to a scalable production environment.

Halliburton (QCDOC & Vendor Portal)

<https://qcdoc-dev.corp.halliburton.com>

ASP.NET Web Forms, ASP.NET Core, React, SQL Server, Entity Framework, Azure, IIS

Worked as a Full-Stack Developer on QCDOC and Vendor Portal, migrating legacy ASP.NET Web Forms to ASP.NET Core Web API, React.js, Entity Framework Core, and SQL Server. Engineered REST APIs, optimized SQL Server procedures and ACID-compliant transactions, and integrated Azure Blob Storage and Application Insights. Refactored legacy code, reducing database response time by 60%, and supported Azure DevOps, Git, and CI/CD pipelines for automated deployments.

NCCCO Certification Platform

<https://stg1995-my.ccocert.org/>

ASP.NET Core, React, TypeScript, Microsoft Dataverse, Power Apps, Dynamics 365 CRM

Worked as a Full-Stack Developer on the NCCCO Certification Platform and LMS, building ASP.NET Core Web APIs and React.js/TypeScript modules. Engineered REST APIs for certification, course, and user management, implemented multilingual (i18n) support, and integrated Microsoft Dataverse, Dynamics 365 CRM, and Power Apps to automate workflows and synchronize business data. Partnered with cross-functional teams to deliver scalable enterprise solutions.

AI Business Location Analyst

(Final Year Project)

Python, Machine Learning, React.js, Playwright, OpenCV, Pandas, Matplotlib, Computer Vision, Data Augmentation, Web Scraping, Google Maps APIs

Built an AI-powered business location recommendation system using machine learning and geospatial analytics. Trained prediction models and automated business data collection with Playwright, Google Maps APIs, and OpenCV for location and traffic analysis. Processed geospatial data using Pandas and Matplotlib, and developed a React.js application for AI-driven location recommendations.

IntellectGate Educational Platform

<https://www.intellectgate.co.nz/>

React.js, TypeScript, Node.js, PostgreSQL, SEO, Google Search Console, Railway, Vercel, Admin Panel

Engineered a full-stack educational platform using React.js, TypeScript, Node.js, and PostgreSQL, featuring a responsive website and admin dashboard. Built REST APIs, CRUD operations, role-based access control, and an optimized PostgreSQL database. Integrated dynamic pricing, enrollment workflows, EmailJS, and on-page SEO (Google Search Console, Bing Webmaster Tools, sitemap.xml, robots.txt). Deployed the application on Railway..

Upwork Analytics (Extension)

ASP.NET MVC, SQL Server

Architected frontend and backend features for an Upwork analytics browser extension using ASP.NET MVC and SQL Server, enabling freelancers to track proposals, client interactions, and performance metrics. Built modules for proposal tracking, statistics management, and reporting, while designing and optimizing SQL Server database interactions for efficient data processing. Enhanced productivity and analytics features by implementing responsive UI components, refined backend logic, and improved reporting capabilities to provide actionable insights.

The Hunt (E-Commerce Platform)

<http://app.thehunt.ltd>

ASP.NET Core Web API, C#, SQL Server, Entity Framework Core, TensorFlow, U²-Net

Worked as a Backend Developer on an e-commerce platform, building ASP.NET Core Web APIs for product, order, inventory, and user management. Engineered REST APIs and optimized LINQ, SQL Server, indexing, and 2NF/3NF database design for high performance. Integrated a TensorFlow U²-Net pipeline for automatic product image background removal and partnered with frontend developers to deliver scalable, maintainable solutions.
